

SCRATCH IN MOTION

We've been studying coding and video editing as separate areas until now, but today we're going to bring it all together and show some cool ways that Scratch and WeVideo can work in harmony to create awesome animations. We're going to create two projects, a WeVideo movie where we import an animated rocket from Scratch, and a Scratch project where we import wacky graphics from WeVideo.

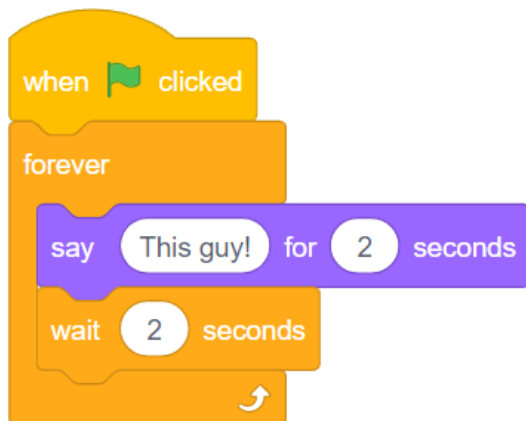

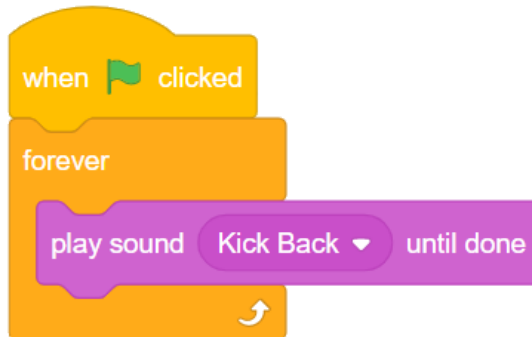

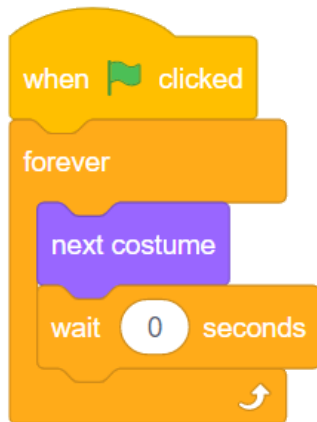

ANIMATED ROCKET

TIN FOIL HAT GUY

FINGER WAGGER

SPINNING BACKGROUND
