LAB

# GET YOUR GEEK ON!

in our pop-up Learning Lab

WE SUPPLY the equipment, but the kids supply the imagination in our paradigm-breaking technology program. It's not a camp, it's a CLUBHOUSE where kids can follow their own creative passions, collaborate with others and explore new technologies.

- Open-ended technology curriculum led by Ontario-certified teachers
- Touchscreen Chromebook computer for every participant
- Learn to code by making video games in Scratch
- Animate your own miniature masterpiece in our stop-motion studio
- Build fantastic robotic contraptions in our maker lab
- Practice film production in our green screen studio
